ORBITEC Earns Multiple NASA Opportunities for Propulsion and Life Support Space Technologies

Madison, WI. Orbital Technologies Corporation (ORBITEC) has recently won two major support efforts for NASA in the areas of propulsion and life support. ORBITEC led a team of small businesses that won the opportunity to provide development support in propulsion systems (**RTAPS**) for the NASA Glenn Research Center in Cleveland, Ohio. ORBITEC's entire team briefed NASA with the vast capabilities it can bring to the space propulsion technology needs of NASA. A series of priority development needs will be presented to be sourced to ORBITEC's team and four other large company teams over the next five years totaling **\$50M**. ORBITEC has integrated a talented and experienced team of small businesses, universities, and a smaller group of large businesses, located in 12 states.

ORBITEC also just won, as part of the Wyle Laboratories team, another development support contract from NASA Johnson Space in Houston, Texas called Crew, Robotics, Avionics, and Vehicle Equipment (**CRAVE**). ORBITEC's primary role is to provide solutions in the area of life support systems and crew related technologies including interactive 3D information systems capabilities. Wyle is one of three companies receiving an award that, cumulatively, is expected to reach **\$70M** over the next five years.

ORBITEC's commercial expansion is going strong with sales and projects coming from every division for government and commercial applications.
