

## ORBITEC Personnel Teach Teachers

On behalf of ORBITEC and AIAA-Wisconsin, Todd Treichel and Mike Fidler administered a Rocket Science workshop in DePere for K-12 teachers primarily from northeast Wisconsin. Funding for the workshop was provided through NASA and the Wisconsin Space Grant Consortium. The goal of the *Rocket Science for Educators* workshop was to assist schools in implementing rocket science into respective math or science curriculums. Participating educators attended a weekend workshop, built and launched payload capable rockets, and received a set of rocket science materials that they may take back to their respective schools. A workshop taught by aerospace professionals provided a unique opportunity for teachers to provide meaningful activities in their classrooms and improve student performance in the fields of science, technology, engineering, and mathematics (STEM).
